

**Eight Mile Corridor Keeper
Code Language
Worksheet Instructions**

As part of this project, it is necessary to gather code language from each jurisdiction. Specifically, we need code language that is related to the exterior appearance of properties located along 8 Mile. To expedite this process, we are asking each jurisdiction to fill out the attached worksheet.

The worksheet contains a listing of the common code topics that govern the exterior appearance of properties. Please provide your code citation in the **Code** column in addition to separate electronic or photocopies of the code language. Also, please feel free to provide additional information on important topics that may have been overlooked.

In the column labeled **Priority**, please rate the top 10 codes with enforcement needs along the Eight Mile corridor.

Several copies of the worksheets are available to help capture code differences between the various zoning districts. Please write the name of the zone at the top of the worksheet.

We hope to compile codes of all jurisdictions into the example 11X17 matrix by the next meeting. With this in mind, please send us the information by **March 15, 2006**.

You may submit your information to:
