

Photo Statements- 9th hour

Kayleigh Schneider

My project is about the appreciation of trees in Suttons Bay. They are all very different and are used in different ways.

Clayton Queen

My project is about the interesting aspects of Suttons Bay. These include water, trees, and signs.

Adam Wodek

The project I did was the new golf SB store. The reason I selected this topic is because golf is a big part of Leelanau County and I am hoping the new store brings more business and tourists. Our county is surrounded by golf courses and is a great activity for all ages.

Jason McKisson

I decided to take pictures of what I liked and didn't like of the town of Suttons Bay. I ended up taking several pictures of what I liked and many less of what I didn't like.

Zoe Allen-Wickler

This collection of photographs mainly explores the nature of Suttons Bay, especially focusing on the textures and shapes of trees and water. Besides this, I found several other fascinating shapes that are not necessarily organic.

Kathrine Stroemmen

Suttons Bay has a lot of great artists who make beautiful art in the downtown area. I think people should pay attention to the art and appreciate the small things that make Suttons bay pretty. My pictures show a little bit of the art pieces and I created a glowing frame around them to make them look glamorous or "holy." I wanted the pictures to look special, just like the art downtown of Suttons Bay.

Lisa Voss

I designed a brochure with the topic “Why do you want to live in Suttons Bay?” Suttons Bay is a beautiful town surrounded by astonishing nature. The little shops and people give the town flair and I tried to point out the charm of this typical small town.

Duane Dodge

My project is about taking photos about signs that limit my freedom. Meaning I can't do certain fun things in this boring town. For example, I took a photo of a sidewalk that says “No skateboards, no bikes.” I like to bike and skate. So there goes one of my freedoms that are limited right there. I am also taking photos of buildings that are eye catchers to me, the ones that are really conspicuous, such as bright colors and neat designs, are nice to me.

Kayla Panyard

My project is about the things I like to do and look at in Suttons Bay.

Sean Patterson

In my project, I am aiming to try and bring the amount of litter to people's attention. I have taken several pictures of the litter in the area, in hopes that people will work harder to keep it clean. On the other hand, I wanted to show some of the things I like about the area, so I took some pictures of that.

Anthony Barrientoz

My project is for a shop during the summer to be able to rent jet skis, kayaks, canoes, and boats with tubes. This will encourage tourists to spend more money in the area. The community will also have a blast going out for a fun thrilled jet ski ride or and leisure kayak trip in the bay.

Randy Kelty

My project was taking pictures of stuff I like in Suttons Bay. I like the new golf store and Candy World.

Nathan Blue

Suttons Bay has a lot of things to offer within a community. These images show natural places within the village limits while changed in Photoshop. These pictures are to show that a person can expect the unexpected, and have a lot of pleasure while living in Suttons Bay.

Tyler Smith

My proposal to enhance Suttons Bay is simple, but one that I believe will make this area even better place to live. My idea is to put a small amphitheater down in the corner of the marina, a little way out behind the public library. This could be a nice area for people to put on local music or other types of performances, with a small line of benches for those that wanted to sit and enjoy what is taking place in the area. We could run power or the area, to set up lights, amplifiers, or any other equipment that required power. I believe this is a good idea to increase the pleasure in this amazing area,

Kevin Brown

I took pictures of Suttons Bay (Ice Cream Factory, Radio Shack, Bahle Hill, Back Roads, and the Marina) noting that need to be changed to show that Suttons Bay is perfectly fine the way that it is, I took pictures of some of the places that might let people know that like the Ice Cream Factory for people to get their favorite ice cream, the marina for families to take their family, the marina for families to take their family or couples to have a great day. People like the back roads for their silence and the scenery. Let people know that Suttons bay is great the way it is.

Nia & Kalynn

Our statement is about how the seasons change in Suttons Bay. We think that Suttons Bay is fine the way it is. We like it because it's not always hot and not always cold. Today Nia and I are going to be showing our favorite season, summer. This season is our favorite because it is when it gets warmer and we can go swimming. We like to chill with friends and play sports. Today, Nia and I are going to be showing our favorite season using the sun in various forms.

Anon

There should be a stop sign on this corner. It is right in front of the church and traffic not stopping could eventually cause problems. Also, on the average day, there is a lack of activities in Suttons Bay. We need some kind of recreational activity to do in Suttons Bay. Certain areas are less presentable than others. Money needs to be spent fixing the worn down areas.

Inna Soroka

As I am from a big city, I miss the noisy, busy life very much. I also miss tall modern buildings. That's why I decided to combine buildings from New York City with Suttons Bay even if it looks a little bit weird. I was trying to make Suttons Bay more attractive for young people.

Maggie Manning

For my project I have taken pictures of the Suttons Bay Marina, and I am going to use photo-shop to add in jet skis. My project is to improve recreational activities on the bay. I have these pictures of the Marina and next I am going to photo-shop in the jet skis. This would be something fun for everyone on warm days out on the bay. And gives people more things to do in the summer.

Markus Wolf

I first arrived in Suttons Bay in August. In that time the summer was just ending and I was able to see how beautiful Suttons Bay is. I saw that the town is in good harmony with nature. I was surprised to see that people were able to live so close to nature. And I was really impressed. Sense first coming here, I wanted to take pictures of the town. Then I could show people from my city how nice it is here. It is important that Suttons Bay stays the same because its natural beauty is very rare. That's why I think Suttons Bay doesn't need anything new. Its beauty is timeless.

Samantha Bergmann

Somehow try to show putting up flea market and some sort of food/drink stand to support tourist (and thirst) in the Marina. The items pictured are some of the products that could be sold.

Trevor West

I'm proposing to show how they should put real food stand in the cafeteria, because the food we have right now isn't the best. It's healthy but not the best. Also there should be some sort of activities planned for seminar and lunch outside, because we don't get enough fresh air and are stuck inside during school, we need a break.

Brooke Crandall

I don't believe that there is anything wrong with the village of Suttons Bay. In fact, I think it's a town that is filled with its own unique beauty. As much, I captured pictures that displays the aspects I believe make our town beautiful. These include our homes devotion to nature, its architecture, and the welcoming environments of the village and its people.

Jordan Crandall

I thought that Suttons Bay could use a bike lane to help ease traffic. By taking photo of the roads in and around Suttons Bay, I was able to create what such a bike lane might look like along the shoulder of the roads. This way, both bikers and cars can travel safety on the roads.

Nick Kiessel

For my project I plan to photo-shop some bleachers around Suttons Bay soccer field to make a stadium. I have taken some photos of the football bleachers and some photos of the soccer field. My next step is to use photo-shop to put them together for my finish project.

Ian Callewaert

For my project I plan to photo-shop a picture of a stadium around the soccer field. So far I have a few pictures of the soccer field and a few pictures of bleachers. My next step is to photo-shop the pictures together to make the soccer stadium.

Travis Smith

I am proposing that the village of Suttons Bay re-starts the towrope on Bahle Hill. To demonstrate this I have taken pictures of Bahle hill as it is now and filled with outdated rusty machinery, and garbage and beer cans. Then I will find a nice looking towrope ski hill.

Charlie Olson

Driving range of option of hitting into the bay, floating target with biodegradable balls.

Cam Regan

This is the future of Suttons Bay. The future of Suttons Bay is a monorail system. A monorail system could bring wealthy tourist from Traverse City to Suttons Bay, and even from other cities to Traverse City. This would bring jobs.

Thomas P

Have a water park or some sort of water fun. I would give kids something to do in the summer. It would also bring more people to the area and more money.

Jose Garcia

Suttons Bay Village has many wonderful places to hang out during the summer, but during the winter there is not a lot of activities to do. There are sports around the area, but not everyone likes them. I thought that having an indoor soccer facility would be a good entertainment for people around Suttons Bay and even people outside of town. Soccer is becoming a very popular sport and winters are way too long. The soccer field could have a mini café, and maybe even other type of entertainment center for students to enjoy and a great place to hang out and make new friends.

Nicollete Bassett

I have lived in Suttons Bay my entire life and I think it is one of the prettiest places. Suttons Bay is a small town, but it has a lot to offer. I think I took pictures of places and things I love about Suttons Bay. My pictures are of the water, the bay theatre, the beach, and the rails to trails. There is nothing I would want to change about the town.
